#TEAMOCEAN FUNDRAISER

WHY FUNDRAISE FOR THE OCEAN?

Taking action and fundraising for ocean protection has never been so urgent! Shark fishing continues to be largely unregulated around the world. Overfishing, bycatch and finning – slicing off a shark’s fins and discarding the body at sea - kills thousands of sharks every day.

Our trash underwater poses a serious threat to endangered marine species and damages vital underwater habitats such as coral reefs and seagrass beds.

WE NEED YOU

Our movement for ocean protection starts with you. We need your support to help fund our work and continue to push for critical safeguards for vulnerable shark and ray species when and where it matters most. There’s no stopping us now but we need your support. Thank you for generously supporting a clean and healthy ocean!

OUR IMPACT

- Trained and supported an army of volunteers to take action against underwater trash and save ocean wildlife
- Removed and reported 1,000,000 trash items from underwater environments
- Close loopholes in the EU finning ban
- Limit international trade in 8 of the world’s most vulnerable shark and ray species under CITES
- Influence decisions to expand conservation for 21 migratory shark and ray species under CMS
